

Tonghui/Techmize Opens New Office in Ismaning near Munich and Expands European Presence – Distribution Agreement with eVision Instruments

Forstinning, April 16, 2026 – Tonghui (Changzhou), an internationally active manufacturer and a leading provider of test solutions for component parameters, power electronics, electrical safety, and cable testing, is opening a new location in Ismaning near Munich.

As part of this expansion, Tonghui has also entered into a distribution agreement with T&M eVision Instruments GmbH. eVision Instruments will play a key role in European sales as well as in supporting customers and partners.

In parallel with its expansion in Europe, Tonghui is also implementing a strategic brand transition: in the future, the company will market its products in Europe under the brand name Techmize, further strengthening its positioning in the international market.

With the new location, Tonghui is specifically strengthening its presence in Europe and expanding both technical support and sales support for its customers. In addition to modern office space, the site also includes its own warehouse, enabling significantly faster product availability for European customers. Furthermore, demo units will be available on-site to evaluate applications and test setups directly under real-world conditions.

“With the new office in Ismaning, we are laying the foundation to support our European customers even more efficiently, quickly, and in a more application-oriented way,” explains Clint Han, International Sales Manager at Techmize. “The combination of technical expertise, regional proximity, and fast availability of our products is a key component of our growth strategy.”

From the perspective of eVision Instruments, the collaboration also represents an important step:

“With Tonghui and the Techmize brand, we are strategically expanding our portfolio in the field of test and measurement solutions for demanding industrial applications. Through our close cooperation and the local presence in Ismaning, we will be able to support our customers even more directly and efficiently manage projects,” Werner Schoeppner, Line Manager eVision Instruments.

About Tonghui / Techmize

Tonghui is an internationally established manufacturer of test and measurement equipment with a focus on solutions for component parameters, power electronics, electrical safety, and cable testing. Under the Techmize brand, the company offers a comprehensive portfolio of innovative solutions in Europe for research, development, production, and quality assurance.

About eVision Instruments

eVision Instruments is a European provider of electronic test and measurement equipment headquartered in Germany. The company offers a broad portfolio of solutions, including oscilloscopes, probes, protocol analyzers, test equipment for power

electronics, and development tools for embedded systems. eVision Instruments supports engineers across various industries with applications ranging from laboratory development and validation to production testing and field diagnostics. Thanks to strong technical expertise and excellent customer service, the company collaborates with leading manufacturers to deliver high-performance solutions for the challenges of modern electronics development.
